

Refocus the Group

IFSP teams occasionally get off task and the service coordinator needs to refocus the group to make sure everything is covered during the IFSP meeting. Below are some tips to consider when this happens. Feel free to add your own ideas and strategies to make this your own.

- ✓ Refer to the agenda
- ✓ Is that something that you can discuss further at your next visit?
- ✓ Would it be a good idea for the therapists to co-treat and/or find some time to talk after the meeting so they can work out some of the strategies being discussed?
- ✓ This is all good discussion but we still need to... before people have to get going.
